WHAT IS ONE OF THE GREATEST THREATS TO HUMANKIND?

What kills more children annually than war, malaria, HIV/AIDS and traffic accidents combined?
One of the greatest threats to humankind is unclean water.

844 million people are living without access to safe water.

80% of all sickness worldwide is related to contaminated water.

Each day, nearly 1,000 children die due to preventable water and sanitation related diarrheal diseases.

Lord, thank you for the sanitation systems that are in place, and we ask that you would provide resources to provide more clean water options for vulnerable people.

In places like South Congo’s Katanga Province, where the rate of infant mortality in the area is among the highest in the world, The Advance is working and investing resources to maintain existing water wells.
